

GEARBOX COMPLIANCE

DAILY CHECKS

Integrate with the Prestart App to create custom Prestart checklists. Driver signature allows individuals to confirm vehicle is roadworthy to the limits of the inspection, when the vehicle leaves the yard or depot.

FAULT RECORDING AND REPORTING

Demonstrate the means to record a fault during a journey. Drivers can log a fault type, attach photo evidence and on submission will instantly email relevant users.

FAULT REPAIR

Easily identify and triage the nature of a fault. Set reminders to monitor the condition of a fault and its repair. Audit logs provide accountability, reporting enables analysis on rectified and tested repairs.

MAINTENANCE SCHEDULES

Custom periodic maintenance schedules enable the user to identify service periods and the tasks to be completed. Establish tolerances on major components in line with the National Vehicle Standards.

RECORDS AND DOCUMENTATION

Record details of accredited vehicles in each module, including: vehicle make, vehicle registration number, VIN and GVM. Access to current documentation is available to all relevant personnel, at all locations where required.

INTERNAL REVIEW AND TRAINING

Gearbox automates quarterly compliance reviews. Gearbox is regularly updated and modified, inline with the National Vehicle Standards. All users and groups receive extensive training and support.
